

Acknowledgement of CISV Policy on Electronic Devices

I understand that Participants are advised not to bring personal electronic equipment (such as mobile/cell/smart phones, portable computers, computer games) to Programs. They may bring them for the journey, but they will be asked to store them with Program staff/Interchange leaders in a safe place for the duration of the Program. I also understand that if such a device is used as a camera, that is *not* a reason for a Participant to be allowed to keep and use the device during the program; it must still be stored for the duration of the program and returned to the Participant for the return journey. Participants wishing to take photos during the program must bring a camera that has no other purpose. Host staff may use personal electronic equipment whenever needed. Leaders and JCs may use personal electronic equipment at the end of the daily program.
